

RHTSS-05 Portable LED Traffic Arrow Board

(Patent Pending)

Traffic Safety System . 116 Carriage Drive . Fairview North Carolina . 28730 . (828) 275.6954

Overview

TSS has designed a portable traffic arrow board for Fire Departments and Law Enforcement to give emergency workers that extra level of protection they so desperately need. This new board incorporated 5 Whelen LED modules which have 96 amber LEDs per module and allows a very distinct sequential arrow movement that is easily seen by drivers. Set-up is fast and easy. In 60 seconds the arrow board will be up and diverting traffic in the direction you need. The unique design allows the arrow board to be mounted in the trailer hitch of any vehicle. The power to run this unit comes from the trailer light plug or a cigarette lighter plug. This is an uncomplicated piece of equipment that will save the lives of responders and law enforcement.

Specifications

TSS Arrow Boards are available in 3 board widths and 2 mounting options and hitch size.

RHTSS05

- Board Width — 36”
- Board height — 12”
- Board thickness — 4.5”
- Operating Height — 6.6’ (+-)
- Volts — 12 to 15 DC
- Whelen LED Modules — 5
- Storage Bag — 36 x 4.5 x 12
- Power source — Trailer plug or cigarette lighter plug
- Weight — 18 lbs

Optional

The TSS Traffic Arrow Board can be operated as a self supporting, stand alone Arrow Board away from the scene. This PPU stand is the same as our ATSL stand but built to hold the TSS Traffic Arrow Board. Run time is 7 to 8 hours. The weight is 42 lbs. Set up is fast and does not need to be monitored.

Also available for the TSSPPU-1 is an FRC 750 watt scene light that will illuminate the area behind the arrow board to light up any reflective on the gear of the personnel on scene. The traffic arrow board and the Scene light are designed to run at the same time for hours.
